

## Authors Workflow - Hindawi Submission

**As of 1.1.2023, the Open Access agreement of BTU Cottbus-Senftenberg with Wiley has been extended to include Hindawi journals.**

Authors\* can now choose funding under Wiley/Project DEAL for publication in Hindawi journals in addition to the previously offered open access and hybrid journals from Wiley. That is more than 1,880 journals authors\* can now choose from!

Hindawi journals, unlike the Wiley submission systems or Wiley Author Services, have a different workflow and use a different submission system. Authors\* submit their manuscript to Hindawi using the Phenom system. You specify your affiliation when submitting the manuscript.

**In Phenom Only one corresponding author (CA) can be specified. Please note that only this step triggers eligibility. This means: the author\* who is eligible must submit and correctly select the affiliation.**

Here is a screenshot of this step:

### Author Workflow- HindawiSubmission

The screenshot shows the '3. Manuscript & Author Details' step of the submission process. At the top, a progress bar indicates four steps: 1. Select Journal, 2. Pre-submission Checklist, 3. Manuscript & Author Details (current), and 4. Files Upload. The main form area contains the following elements:

- Manuscript Title:** A text input field with a placeholder 'Text manuscript for author's guide'.
- Abstract:** A larger text input field with a placeholder 'Text abstract of my manuscript'.
- Manuscript Type:** A dropdown menu with 'Please select' and two visible options: 'Review Article' and 'Research Article'.
- Authors:** A section with an 'ADD AUTHOR' button and a table for author details. The table has columns for 'Email', 'First name', 'Last name', 'Affiliation', and 'Country'. One author is listed: Aurelia Apetrei (Email: aurelia.apetrei-author@hind..., First name: Aurelia, Last name: Apetrei, Affiliation: University of Cambridge, Ca., Country: United Kingdom of Great Br...).
- Navigation:** 'BACK' and 'NEXT STEP' buttons at the bottom.

Logos for 'WILEY' and 'able' are visible at the bottom of the screenshot.

As the submission process continues, authors\* will receive emails about:

1. submission, acceptance, rejection or withdrawal of the manuscript.
2. approval or rejection of the submission.

There are Hindawi journals that are published in cooperation with other publishers. Thus, the following Hindawi journals are NOT Wiley/Project DEAL eligible:

- Australian Journal of Grape and Wine Research (1755-0238, ASVO)
- Advanced Gut & Microbiome Research (2755-1652, Hangzhou Aimeida BioTech Co., Ltd)
- Adsorption Science & Technology (2048-4038, Sage UK)
- Genetics Research (1469-5073, CUP)
- Global Health, Epidemiology and Genomics (2054-4200, CUP)
- International Journal of Distributed Sensor Networks (1550-1329, Sage UK)
- Journal of GeoEnergy (2976-5501, Northeast Petroleum University)
- Journal of Smoking Cessation (1834-2612, CUP)
- Journal of the Renin-Angiotensin-Aldosterone System (1752-8976, Sage UK)
- Laser and Particle Beams (1469-803X, CUP)
- Mental Illness (2036-7465, Emerald)
- Molecular Imaging (1536-0121, Sage US)
- Wireless Power Transfer (2052-8418, CUP)
