

## meet.btu on smartphone

**Note:**

To use meet.btu for a video conference, a Wi-Fi connection is recommended. Otherwise, your monthly available data volume may be severely affected.

Depending on your OS, download the "Jitsi Meet" application from PlayStore / AppStore and install the application. After successful installation, start the app.

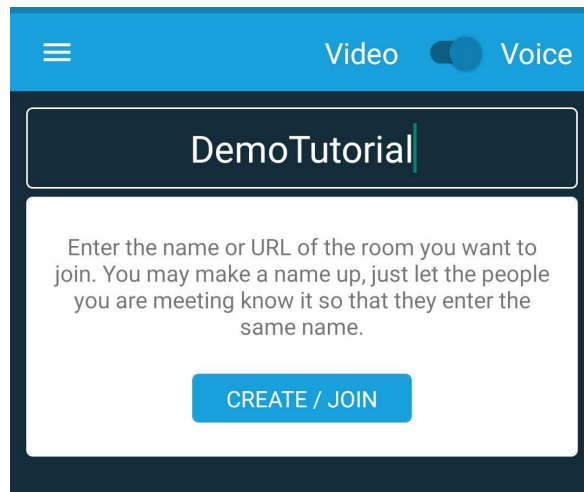

Click on the menu at the top left and select the item **Settings**. First, change your display name for an easier identification of users. You also have the option of entering an e-mail address to provide the participants of the video conference with a contact address. Finally, the server URL needs to be changed to <https://meet.b-tu.de/>.

## meet.btu on smartphone

Then return to the app's home screen.

Assign a descriptive title to your web conference in the central text field, without special characters, and open the meeting by clicking on **Create/Join**. You will be automatically redirected to the corresponding web conference.

By default, the permission request opens for accessing your **microphone and camera**. You need to grant these permissions by clicking on Allow.

To **start the web conference** and unlock it for participants, confirm the prompt that appears by clicking *Ok*. In the next step, you will be asked to authenticate yourself via your central BTU login.
