

Funded Student Mobility Opportunity

As part of the ongoing joint research collaboration with California State Polytechnic University (CalPoly), USA, two student mobility opportunities are now available.

The selected student will receive a full financial support to stay at CalPoly for one semester (3-4 months). During this period, the student will:

- Conduct research within the partner research team at CalPoly
- Can enroll in and complete selected module(s) at CalPoly and transfer the earned credit points to BTU

Research Focus

The research topic centers on gas dynamics and combustion modelling radial wave engine concept.

Therefore, applicants are expected to:

- have prior experience or ongoing work in numerical combustion, CFD, or related areas

or

- be willing to actively working on a closely related topic at BTU before the start of the mobility period

If interested, please send an email to asli@b-tu.de, including CV and the current transcript.
