

Funded Student Mobility Opportunity

As part of the ongoing joint research collaboration with Pusan National University (PNU), South Korea, two student mobility opportunities are now available.

The selected student will receive a full financial support to stay at PNU for one semester (4 months). During this period, the student will:

- Conduct research within the partner research team at PNU
- Can enroll in and complete selected module(s) at PNU and transfer the earned credit points to BTU

Research Focus

The research topic centers on numerical heat transfer analysis of heat transfer devices for aviation applications.

Therefore, applicants are expected to:

- have prior experience or ongoing work in numerical heat transfer, CFD, or related areas

or

- be willing to actively working on a closely related topic at BTU before the start of the mobility period

If interested, please send an email to asli@b-tu.de, including CV and the current transcript.
