

Department of Aquatic Ecology

Responsible: Dr. Jacqueline Rücker

The Department of Aquatic Ecology offers ERM master students the chance to participate in a practical course during the lecture-free period. Herein students will get to know the basic methods for the investigation of standing and running waters. During three weeks, we will conduct field measurements with different probes, limnological sampling, microscopical, and laboratory analyses. Through those, students will gain hands-on experience with experimental approaches to scientific questions and monitoring procedures.

At the end of each course part all acquired data will be critically analyzed and prepared in a written report. Further information regarding the assessment is provided in the module description. The department organizes the stay at the Research Station in Bad Saarow. Students will lodge in a regional hostel within walking distance. The down payment for this accommodation is due at the beginning of the semester. Students will register via the official exam registration portal and receive a confirmation email with payment details at the beginning of the semester.

Block course duration: 3 weeks (14.08. - 01.09.2023)

14.08. – 18.08. Research Station Bad Saarow

21.08. – 01.09. Main Campus, Cottbus

Prerequisites: 13298 BFM and/or 42505 FRE

Max. Number of participants: 12

Payment: 100 € (due with confirmed registration)

Registration deadline: April 9th 2023 (online)
