CLIMATHON

... the green hackathon

Rethink the future of clean energy and industry!

At the Climathon, student teams from Germany and Poland work on one mission: to develop THE idea for THE green start-up of the future.

Why taking part is worth it:

Expertise: Professional coaching from start-up specialists and an international hackathon pro.

Interchange: ... with experts from business, science & co. as well as entrepreneurs

Exposure: Present your idea on June 25th on the big stage at the Decarbon Days.

Here's how you can take part:

Apply now as a team of four students via the QR-code. Make your vision a reality.

Envision the next green start-up!

Deadline: May 15th

Reward: 1,000 euro prize money, more prizes from partners, award, **contacts, certificates** for everyone and more ...

DECARBON DRAFTS

... your research in the spotlight

Is your bachelor's, master's or doctoral thesis about decarbonization?

We give your work (whether ongoing or completed) the attention it deserves – with a presentation on the big stage and a practical exchange.

This is what participation offers you:

Support: Get qualified coaching in creating a science poster and an elevator pitch from multiple experts.

Network: Direct exchange with renowned players from business, science and more.

Visibility: Present your work on the stage and at an exhibition in front of experts.

Your next step:

Apply now using the QR code.

Make your work visible among regional actors from science, business & co.

Deadline: May 15th

Reward: 500 euro prize money, more prizes from partners, important **contacts, certificates** for everyone and more ...
