

HOW TO ACQUIRE FUNDING FOR YOUR RESEARCH CAREER – FROM WRITING A SUCCESSFUL PROPOSAL TO SCIENTIFIC CAREER DEVELOPMENT

CONTENT

Successful application for third-party funding is getting increasingly important for researchers. Experienced researchers, who normally have obtained a PhD, can realise own project ideas by acquiring substantial funding from various third-party donors. However, achieving funding represents quite a challenge, especially for young researchers in this competitive field.

The seminars show how to identify and analyse funding opportunities and point out major differences between the most important national and European funding programmes. Different types of project funding will be explained and strategies for developing a research funding plan will be discussed. We will demonstrate how grant proposals are reviewed and provide details on dos and don'ts in writing a proposal. Finally, important aspects, such as research data management and open access publications, will be discussed in more detail.

The individual seminars can be attended independently and will be held in English! Please register by E-mail.
