

On the date of 01. 10. 2019 I first reached to Lublin University of Technology in Poland. The journey from capital city Warsaw to Lublin was only possible by bus but not any trains. After reaching the university, I directly went to check in to my dormitory room from the university which was pre-booked. On the reception desk, reception personals, International relation office members next doors were welcoming all the new incoming students in the university. Coming to the dormitory area, it was a combined room for 3 students with 3 beds and small shelf area. Outside environment of dormitory was not very well maintained. There were hygiene issues with untidy kitchen and bathroom, smoking permission inside dormitory that honestly didn't made me much happy so that I had to Suddenly check out the dormitory and find out the new accommodation. The process was not very easy and language barrier had made it extra difficult.

Few weeks later as I came to discover the city Lublin and the University, things got easier. All the staffs in the University were very friendly and kind. Lublin city itself is a very old city carrying a huge history of Europe. City is about 150 km far from its capital and is one of the biggest cities out of 7 biggest cities of the country. It has more than 5 public universities and many private colleges too. In Lublin University of technology, there were well managed schedules for the ERASMUS students. All students were given opportunities to go to any of the faculty of own interest. There all ERASMUS students were friendly too, so I had an opportunity to make friends from other countries too. ERASMUS has refreshed me and built up my confidence level and help me to improve my own personality. Despite of extreme coldness in the city Lublin, I had an amazing time during my ERASMUS. I am very thankful to my BTU ERASMUS team, specially to Miss Karin Robel.
