

## PERSONAL REPORT

I am a current BTU Student who came to study in Warsaw University of Technology as an Erasmus student. My host university student ID number at WUT was K-6168.

My preparation to Study was swift and I owe a lot of appreciation and thanks for Ms Karin Robel for her role in assisting me as it was quite swift even with the circumstances at the time

Due to Covid.

I arrived very early on 22<sup>nd</sup> of February 2021, rented an apartment and studied though it was quite demanding as it was online and not getting assistance of

Students who had the background of Mathematics was quite demanding.

I was however able to succeed on some courses and the experience has been quite interesting and

I cannot wait to bring with me a lot of experience gained while studying here.

The living conditions has been good even though it was quite challenging due to the Covid situations but it has been a great experience I will remain grateful for and would do again if

Granted the opportunity. I wish to thank BTU Cottbus for granting me this opportunity and wil return back soon to complete my studies there.
