

Power your career & Electrify the future

We've been changing the way the world is powered for the last 100 years. Now, you can play a role revolutionising the next 100. Join Rolls-Royce Electrical as we lead the way in sustainable aviation.

Working with innovative partners, we're developing, testing and innovating electric and hybrid electric technologies and systems that will take aviation into a bold, new, sustainable world.

We need to grow our world-class team of innovators. This is your chance to be part of an era-defining journey in aerospace.

We need:

Electrical Design Engineers / Electronic Power Management Engineers / Product Safety Engineers / Electronic Machine Designers / Systems Integrators

To be based in Dahlewitz, Munich or Erlangen.
