

How to enrol in language courses

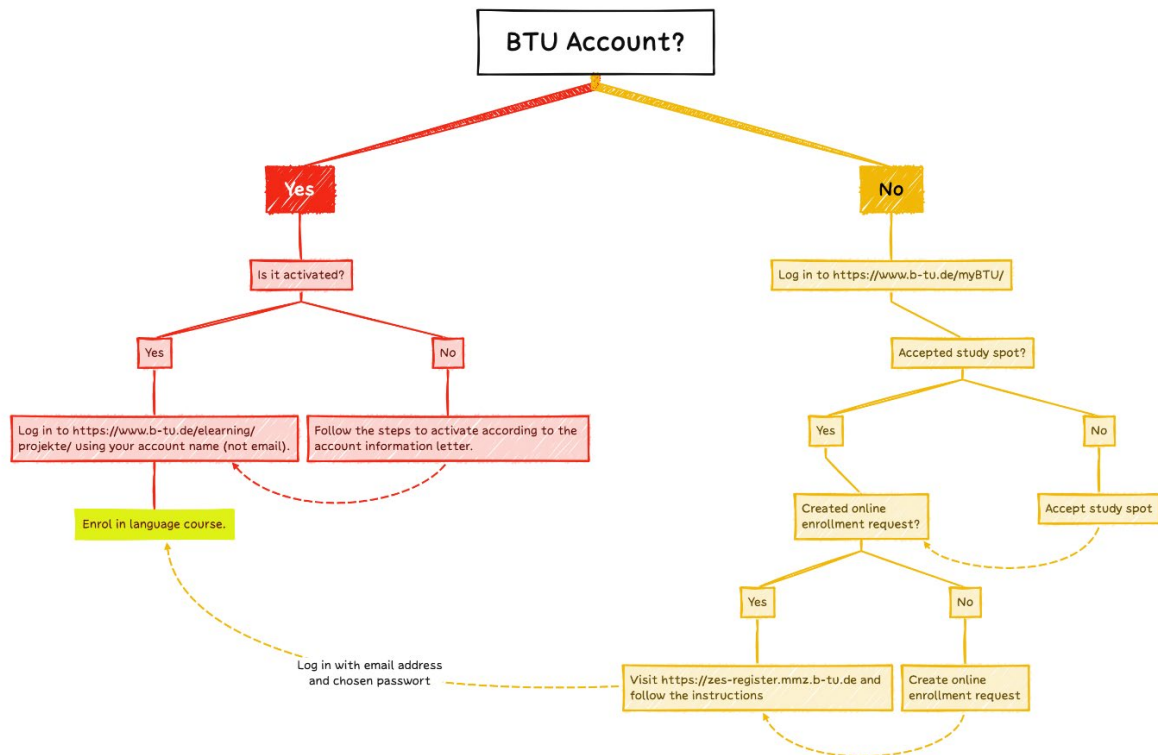

If you have a BTU account

If you have a BTU account, use it to log into Moodle Projekte (<https://www.b-tu.de/elearning/projekte/>). If your account is new, make sure it is activated. The letter with your account information also includes information on how to activate your account.

To log in, you have to use your BTU account name and password, not your email address. Your account name is 8 characters long and typically consists of the first 5 letters of your family name and the first 3 letters of your given name.

If you don't have a BTU account

If you don't have a BTU account yet, please make sure you have accessed myBTUportal (<https://www.b-tu.de/myBTU/>), accept the study offer and create an online enrolment request. You can then use the registration website <https://zes-register.mmz.b-tu.de> to create a Moodle account by following the instructions on that page. If you entered multiple email addresses at myBTU, use the main contact email address. If there is any technical issue please email to elearning@b-tu.de with a detailed description.
